

Your True One-Stop Leisure Travel Resource

Galileo Desktop 2.0™

Do you offer what today's travellers want?

How do you capture attention, sales and repeat business from leisure travellers in today's competitive environment? How do you stand out from the competition? Travelport has answers and they come easily through Galileo Desktop 2.0 – your definitive one-stop solution for complete leisure travel planning and management.

Grow easy with Galileo Desktop 2.0

Desktop 2.0 is the flexible and customisable global reservation, management and productivity system for today's leisure agencies. It has the unique tools and all of the content your agents need to shop travel in every segment and book the best options for today's demanding travellers. Plus, your agents will reduce errors, improve efficiency and increase sales with ease. You'll appreciate how your agents close sales fast, and how itinerary data automatically interfaces to your back office. And your travellers will like receiving instant access to their personalised itineraries at the Travelport ViewTrip™ Web site (www.ViewTrip.com).

THERE'S NO NEED TO LOOK ANYWHERE ELSE

- > **Access global content** from the Galileo global distribution system (GDS) – the world's airlines, hotels and resorts, car rentals, tours, cruises, rail, ground transportation, foreign currency services, insurance, theatre, entertainment, attractions and more
- > **Sell up with value-added offerings**, including vacation packages, sightseeing and more – all without leaving the agent's desktop
- > **Receive an aggregated view of a complete spectrum of fares** in a single bookable display – published, ATPCO-filed private fares and Agency Private Fares
- > **Benefit from unmatched accuracy** in global fares, pricing and rules
- > **Manage private fares via the Web** with a powerful negotiated fares tool
- > **Increase speed, accuracy and efficiency** with the latest shopping, pricing and booking tools, including group booking capabilities
- > **Compete with the leading low-fare shopping tools** for the best low fares worldwide
- > **Receive system enhancements and upgrades**, and design your own desktop with advanced connectivity and customisation capabilities
- > **Automate repetitive tasks and accelerate bookings** with productivity-building scripts
- > **Localise your travel planning and management** with the support of 23 languages
- > **Become more proficient** and unleash the full power of Desktop 2.0 with world-class online learning and development resources

Today, it's all about choice

Travellers must tap multiple resources to build a complete trip, and as good as they are at finding their own options, they still question whether there's a better deal out there – a nicer hotel, a lower fare, a more valuable vacation package. Usually there is, and Galileo Desktop 2.0 can find it. You can deliver the most exceptional travel experiences every time by offering everything travellers want – all in one place. How?

Galileo Desktop 2.0 leverages our e-commerce expertise, the strengths of Travelport GDS and our travel supplier relationships worldwide. The combination brings you unparalleled content from the traditional and online worlds – and the most advanced, flexible technology for every facet of leisure travel planning and management.

Powerful choices for you, too

Desktop 2.0 offers two portals so your agents can choose how they want to work:

- **Galileo Viewpoint™** lets agents work in an easy, graphical, point-and-click environment. Whilst Viewpoint dramatically shortens the learning curve for new agents, it also simplifies the shopping and booking process for agents at any skill level with clickable buttons, icons, menus and check boxes to make the entire travel planning process intuitive and fast.
- **Galileo Focalpoint™** is our traditional cryptic entry shopping and booking portal for agents who know GDS entries and formats. Still, we keep making Focalpoint better. Today, it offers interactive capabilities, point-and-click functionality and also colour coding to help agents easily compare on-screen results. Focalpoint's intuitive, interactive functionality gives busy travel agents the edge they need to manage travel with greater speed, accuracy and efficiency.

Our Desktop 2.0 software development kit (SDK) lets you design your agents' desktops the way you want, with customisable layouts, scripts, programmable functions and other ways so that your desktop fits your unique requirements and business practices.
