

Completely Automated Fares and Pricing Galileo 360 Fares™ and Agency Private Fares

Do you need a better solution for shopping airfares?

Do you spend valuable time searching multiple fare sources, handling non-automated fares and rules, or comparing private fares with those that are published? When you manually price fares, do you experience data entry errors that result in debit memos and unhappy travellers? If your answer is yes to either of these questions, Travelport can help reduce or eliminate your challenges, make you more productive and turn your losses into financial gain.

Let Galileo Fares automate your world

Why not operate in a world where every fare is automated and instantly accessible through one source? With Galileo 360 Fares and Agency Private Fares, you can.

Galileo 360 Fares is the global fares and pricing system powered by the Galileo™ global distribution system (GDS). It delivers the inventories of airlines worldwide, including low-cost carriers, giving you access to millions of published and Web fares, real-time pricing and availability, and the latest shopping tools. Galileo Agency Private Fares lets your agency enter negotiated airline fare contracts into the global Galileo 360 Fares database via the Internet. Another Web-based extension of the Galileo 360 Fares portfolio, the Agency Private Fares XML Interface, enables private fare data to be uploaded to Galileo 360 Fares from any third-party private fares database to eliminate manual fare loading, save time and reduce data entry errors, resulting in lower operating costs and increased customer satisfaction.

The result? Every fare you need is integrated into your shopping displays for fast, easy comparison in choosing the best options for your travellers.

YOUR ONE-STOP GLOBAL RESOURCE FOR AUTOMATED FARES AND RULES

- > **Greater efficiency and accuracy** with access to a full complement of automated fare types through one source: Public, private (e.g., consolidator, corporate, negotiated, etc.), Web fares – including the full benefit of Automated Rules processing, regardless of whether fares are filed via Agency Private Fares, Airline Tariff Publishing Company (ATPCO) and/or SITA
- > **Up-to-the-minute fares, pricing and rules from 425 airlines worldwide**, including the inventories of more low-cost carriers than any other GDS provider
- > **Maximum productivity** with access to fares through all of Galileo's corporate, leisure and Web-based travel management solutions: Galileo Desktop™, Galileo Online Travel™ (GOT), Galileo Web Services™
- > **Industry-leading data and system processing times** for the fastest, most accurate fare displays, shopping and price quoting
- > **Access to ATPCO and SITA Category 35 negotiated fares**, including net, selling and ticketing fare data
- > **A mark-up tool for net fares**, which supports automated fare quotes and implements mark-up limitations filed by airlines through ATPCO and SITA
- > **Highly stable global distribution system** delivering 99.9 percent core system uptime over the past five years, based on both scheduled and unscheduled outages

Broadest content and highest accuracy through Galileo 360 Fares

You need the strength and purchasing power of a leading global fares and pricing system – one that offers uninterrupted, real-time content from airlines worldwide, secure transaction processing and the most advanced e-ticketing capabilities. Galileo 360 Fares provides the content you need to serve today's travellers, and with automated loading of public, private and Web fares through ATPCO and SITA, accuracy is ensured and debit memos are virtually eliminated.

Travelport operates globally with a strong focus on local market needs. The Galileo 360 Fares system serves one of the largest networks of airlines, travel retailers and corporations. We continually enhance the system to help our partners in every world market operate more efficiently and increase traveller satisfaction.

Want to know more about Agency Private Fares?

Galileo Agency Private Fares is a Web-based tool that completely supports the airfare shopping and pricing requirements of Galileo-connected retailers, corporations and Web sites. Through its graphical user interface (GUI), you can load and automate non-published or manually sourced fares distributed to you via manual methods from your airline or consolidator partners.

Fares and associated rules are quickly available through the Galileo 360 Fares database for distribution, access and display within your organisation, including your branch offices. Private fares contracts and conditions from the simplest to the most complex are accommodated. You have the ability to enter private fare data using zones, control who can sell and/or ticket contract fares, and much more.

Agency

Get instant, automated access to every fare
