

The Multi-Host Technology Platform for Today's Airlines

Travelport Meridian™

What path are you taking to profitability?

Is your airline under pressure to cut costs yet improve operations, sales and service? Are you looking to technology to reduce spending, increase revenues and deliver more reliability and speed for a greater competitive advantage? If so, have you evaluated the costs and benefits of refreshing your current hosting and IT platform versus taking a new approach? Setting a new technology course can be daunting without the expertise and guidance of a knowledgeable provider. Every dollar of your IT spend must bring a fast return on your investment, and your decisions will have long lasting impact.

Cost, relevant technologies and support from your provider are critical – but they're not enough. Today, you need flexible, customisable solutions to support your unique and evolving business model. This is where Travelport stands out amongst the competition.

THE TECHNOLOGY YOU NEED. THE FLEXIBILITY YOU WANT.

- > **Fully integrated hosting**, IT and software applications that streamline your operations, eliminate out-of-sync data issues and reduce your messaging costs
- > **A Reservations Management System** that focuses on your passengers and controls your costs through the most advanced and effective fares, pricing, ticketing and data support systems
- > **An Inventory Management System** that maximises your yield and manages schedules, availability and seats
- > **A Departure Control System** with customer-centric check-in capabilities that provide a single point of information for every passenger
- > **A hybrid technology hosting platform** combining cost-effective open systems with reliable and secure enterprise architecture, leveraging the strengths of each
- > **Solid system performance** with an average of 99.9 percent core system uptime over the past five years
- > **Rich functionality** at your core, supporting best-of-breed peripheral solutions – keeping your IT spend low and your functionality high
- > **Renowned fares and pricing products** that lead the industry in functionality and efficiency
- > **Exclusive value add tools** for re-pricing ticketed itineraries, shopping low fares, ensuring fare data integrity and protecting your revenues
- > **Interactive communications and connectivity solutions** to support your partner airline and codeshare relationships
- > **Intuitive graphical interface options** for ease of use, high productivity and minimal training
- > **Web-based e-commerce and connectivity solutions** for fast, cost-efficient operations and distribution

Travelport Meridian It's not all or nothing

Travelport Meridian takes pressure off of today's airlines. Our proven, multi-host technology platform offers the time- and cost-saving flexibility you need to enhance the operational and technical aspects of your hosting, distribution and technology platform, and a lot more. You can deploy valuable add-on solutions – at your own pace, and share in joint developments from the airline industry's leading community model.

Travelport Airline IT Solutions™ is an industry leader in sophisticated products and services for global, regional and low-cost carriers. Our solutions leverage the hybrid technology of the Travelport Meridian multi-host platform to provide a cost-effective, customisable and highly available infrastructure to meet your unique needs. All together or a la carte, the value of Travelport Meridian is in your options, and they're all backed by the experience and integrity of Travelport.

Take advantage of shared development opportunities

Are you looking for a supportive technology partner that understands your challenges, delivers the right solutions at the right time and also works with you in developing customised solutions? How about a growing development community made up of your peers? Through Travelport Meridian, you get both. In addition to proprietary software to meet your unique and competitive requirements, you have access to new solutions developed by and for our community of Meridian participating airlines.

When customer buying patterns call for new functionality, Travelport and our Meridian airlines work together to keep new development, maintenance and production support costs in check. And that's just the beginning. Our community produces innovative technologies to keep airlines on top of industry trends and new opportunities. The value of Travelport Meridian to your airline continues to grow.

Who will look out for your future requirements?

Travelport has been a leader in airline hosting, IT services and software for 35 years, and we're just getting started. The scalability of Travelport Meridian and our depth of experience ensure you'll have the solutions and capacity you need to meet unexpected opportunities and demand – and respond quickly to market changes.
