

Make Fast, Cost-Effective Airline Partner Connections Travelport Interchange Suite™

When opportunity knocks, how do you answer?

Does your airline have opportunities to grow through new partnerships yet lack the connectivity tools to get those relationships off the ground? What about your investment and time to market – are you faced with steep development costs or lengthy implementation times?

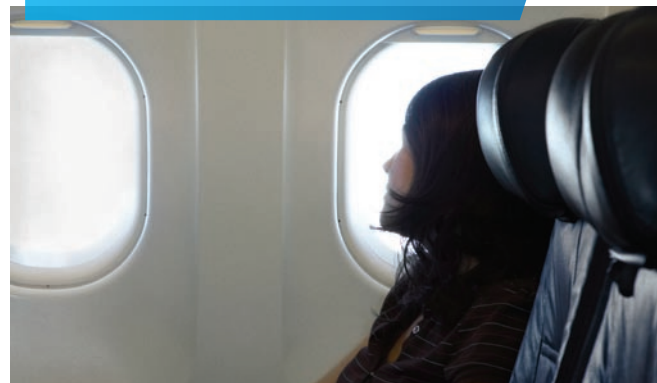

In today's partnership-driven market, airlines worldwide are relying more and more on their alliance and codeshare partners, and support from ground handlers, to deliver the best traveller experiences. If technology or cost challenges are preventing you from answering the call, Travelport Airline IT Solutions™ can help you eliminate them.

Travelport Interchange Suite – connecting airline partners worldwide

The Travelport Interchange Suite quickly solves business issues, reduces the cost of establishing partner connections and activates connections faster than other solutions on the market. Best of all, each tool stands alone, letting you seize new opportunities as your business and financial requirements allow.

CONNECT TO YOUR PARTNERS WITH THE LEADING PROCESSING TOOLS

- > Reduce IT spend, accelerate time to market and ensure the highest levels of efficiency between you and your partners with a collection of proven, stand-alone solutions
- > Significantly increase your ROI through reduced implementation costs of up to 70 percent
- > Achieve fast compliance with industry mandates
- > Implement only one link for each Interchange tool
- > Activate connections in just days versus months compared to traditional approaches
- > Capture new business opportunities with flexibility and speed by means of single, concurrent and overlapping implementations
- > Eliminate messaging barriers through automatic handling of various EDIFACT versions
- > Reduce testing time up to 75 percent through normalised messaging
- > Ensure you operate using the industry's most relevant technologies with ongoing enhancements and upgrades

Our growing Interchange Suite is a proven collection of translation and message switching tools that support functions between airline partners in the fastest, most cost-effective ways – from reservations processing to interline e-ticketing (IET) and airport check-in.

Unique in the industry

If you want the most comprehensive and cost-effective solution for interactive connectivity, and if access to additional airline content will help satisfy your customers' demands, consider these advantages: No other processing solutions offer you the same value, speed to market, design and cost-efficiency for interactive messaging applications to support your partnerships and alliances.

All Interchange Suite products use an interactive message translation and switching facility to reduce activation costs and time to market, and improve implementation efficiency. Our innovative rules-based database stores your business rules, EDIFACT version level and structured message formats to encode and decode messages exchanged with your interline partners. A one-time connection is all that's required for each product.

Travelport Reservation Interchange™

The Reservation Interchange provides interactive message translation and switching for Direct Access, Seamless Availability, Interactive Sell, Interactive Seat Maps and Interactive Seat Assignment between you and your partners. You can maintain control of your inventory and support partner sales of award classes. These enhanced alliance and codeshare functions greatly increase your customer service and satisfaction levels.

Travelport E-Ticket Interchange™

Our renowned E-Ticket Interchange was the first product supporting a true interchange process. Today, the technology serves over 5,700 interline e-ticketing (IET) relationships, processing over 55 million messages every month. You and your airline partners, and ground handlers, benefit from the most advanced global e-ticketing message switching platform. The E-Ticket Interchange performs interactive message translation and switching functions for interline e-ticketing, and both interactive and control methods for ground handling.

Travelport Check-In Interchange™

The Check-In Interchange provides proficient interactive message translation and switching between airline partners for Inter Airline Through Check-In (IATCI) functions, including seat map, check-in, update, cancel, acknowledge, and boarding pass reprint.
