

Shop and Book Vehicles Worldwide Right From Your Desktop Worldspan™ Car Rental Solutions

Become more profitable through the 'power of one'

More car rental bookings could create a valuable new revenue stream for your agency. Start building profits today through the power of one – just one more booking per day can significantly increase your revenues and give you a strong service advantage, too.

The comprehensive Worldspan Car Select™ system and our advanced, Web-based Worldspan Go!™ Car Booking Tool present you with a commanding suite of car rental shopping and booking technologies to immediately expand business in today's market.

CATER TO CUSTOMERS, DRIVE HIGHER SALES

- > Get real-time access to rates and associated rules, representing availability from over 25 car rental companies and 30,000 locations worldwide
- > Reduce operating costs using efficient shopping and booking tools conveniently located on your desktop
- > Book with complete confidence by receiving up-to-the-minute availability and rate responses, and instant confirmations – directly from supplier central reservations systems
- > Add corporate or negotiated rates into the shopping process with one easy click
- > Process inquiries fast by instantly retrieving rates based on customer needs, such as preferred suppliers, rate codes, one-way rentals, corporate discount numbers and more
- > Exceed traveler demand with ACRISS classification codes, which let you shop makes, models, vehicle types, fuel types, number of passengers, and even late model accessories

You're a global car rental expert with Worldspan at your side

Travelport has been partnering with car rental suppliers globally for more than three decades to expand car rental distribution capabilities through the global distribution system (GDS). Worldspan's Car Rental Shopping and Booking Solutions are among the most advanced, comprehensive and flexible desktop systems in existence for travel agencies today.

Solid global connections

Worldspan Car Source® lets you experience the benefits of the highest level of connectivity for car rental companies through the GDS-based Worldspan Car Select system. Car Source supports interactive connectivity between your desktop and the internal systems of participating suppliers. This real-time environment gives you up-to-the-minute rates, availability, quotes and instant confirmations from suppliers.

The Worldspan Go! Car Booking Tool lets you shop and book vehicles in a rich media, browser-based environment offering Web-like displays, point-and-click functionality, interactive features and thousands of vehicle images from suppliers. The Go! Car Booking Tool is powered by the GDS-based Car Select system, providing the same real-time supplier connectivity and global content.

Worldspan Car Source Complete Pricing provides total estimated costs within your availability displays. This feature builds trust by reducing rate discrepancies and unexpected costs for your customers. Estimates include the cost of a rental period, extra day/hour details, taxes, fees, surcharges and mandatory charges.

Tap Travelport Car UpSell™ to build profits and customer satisfaction

Travelport Car UpSell gives you opportunities to not only earn a higher profit margin but also enhance customer service by offering larger or more prestigious vehicles at an affordable price from participating suppliers. Higher-class vehicle options are presented to you during the booking process. At a glance, you can quote an UpSell rate from the supplier and the amount required to upgrade a vehicle.

MAINTAIN A STRONG COMPETITIVE EDGE

- > You can combine car bookings with air and hotel segments in one PNR to streamline front- to back-office workflow – and satisfy customers with a completely inclusive itinerary
- > The Worldspan Car Default Record accelerates your process by letting you pre-define criteria you apply to availability searches
- > You can book reservations at many types of locations, including on/off-airport locations, train stations, resorts and more
- > To validate rates and bookings, you get a snapshot of the reservation through exclusive Worldspan Car Source reservation displays
- > Complete information about a traveler's reservation is automatically added to the booking record through Worldspan Expanded Car Segment functionality
