

Delivering affordable solutions for your paperless environment

Lower costs, expand your reach and build strong partnerships

Are development costs, lack of resources or your IT provider hindering your ability to expand your network or interline with other carriers? Are you able to complete e-ticket transactions through a global distribution system?

Travelport e-Ticket Technologies is redefining the standard in e-ticket solutions, database hosting and interline e-ticketing services with highly scalable solutions for airlines of any size. Designed to support your business model and increase opportunities for revenue growth, Travelport e-Ticket Technologies fast and affordable solutions include:

- The Travelport ETDBase: hosting service stores and manages all of your e-ticket data for online and interline transactions
- The Travelport EMD Database: stores and manages all of your online electronic miscellaneous document (EMD) transactions

The EMD Database design and unique functionality support EMDs for ancillary services, and ensure utmost data accuracy and integrity. Both ETDBase and EMD Database services will help you optimize your operations and productivity, lower operating costs and compete worldwide.

Gain new opportunities through a connected world

- E-Ticket Technologies include automatic access to the Travelport e-Ticket Interchange – a message switching and EDIFACT translation service that manages the exchange of e-ticket messages between e-ticketing partners.
- If your interline processing needs go beyond the e-ticketing arena, the full Travelport Interchange Suite also includes Travelport Check-in Interchange and Travelport Reservation Interchange.
- Activation costs are dramatically reduced by up to 70 percent compared to other solutions, and implementation time is also decreased for improved efficiency.

Experience the full range of IATA-compliant e-ticketing capabilities

Our globally recognized e-Ticket Technologies offer full e-ticketing database functionality to meet your requirements and budget, within your desired timeframe.

- Implement bilateral e-ticketing capabilities that present full e-ticketing and EMD transaction capabilities for you and your partners worldwide
- Manage online or interline e-tickets, and receive IET transactions from your partners
- Facilitate e-ticketing transactions from travel agencies through Travelport as well as online travel distributors

More advantages for a competitive edge

Travelport e-Ticket Technologies are platform-independent, so every airline can take advantage of our portfolio's comprehensive capabilities:

- Be up and running with implementation speed that rivals traditional methods
- Maintain one link to Travelport for access to all of your e-ticketing partners
- Eliminate the costs and maintenance of supporting multiple EDIFACT versions
- Easily adhere to industry-defined e-ticket and EMD messages and processing
- Uphold coupon integrity through validation checks
- Establish daily reports and files for management and accounting purposes

Increase profits in your distribution channels of choice

- Substantially reduce your e-ticket and EMD database costs by subscribing to a leading and proven global solution, versus building and maintaining your own
- Capture new business through codeshare, alliance, interline and ground handling relationships
- Enable e-ticket-based distribution to reach third-party distributors
- Save testing time and mitigate risk by implementing a proven database and interchange that allows connectivity to over 400 airlines worldwide
- Quickly realize new opportunities through our rapid implementation process that establishes interline partner connections in days rather than months
- Take a flexible approach to implementation: Development can be synchronized with your own processes and timetables, creating a phased approach to functionality

Lower your costs as you expand your reach and revenues
