

First Latin American company launches Travelport's industry leading technology to increase revenues and to improve traveler airport experience

27 October 2016

Peru's Talma adopts Travelport's iPort load control system technology

Travelport (NYSE:TVPT), a leading Travel Commerce Platform, announced today that Talma, Peru's largest ground handling company, has become the latest airport services company, and the first in Latin America, to adopt Travelport's iPort Load Control Suite.

iPort is the most efficient and flexible departure control system (DCS) technology currently available. Over 45 airlines and ground handling companies, at more than 160 airports worldwide, have chosen Travelport's iPort DCS. Developed in collaboration with airport handling system leader, Res2, iPort is a web-based application which delivers commercial and operational advantages to both airlines and ground handlers by streamlining departure operations, centralizing load control, and improving the traveler experience at the airport.

Lima-based Talma, operating airport services at Peru's 19 main airports, processed more than 100,000 flights, and moved over 190,000 metric tons of airfreight in 2015. As Latin America's first company to adopt iPort, Talma is uniquely positioned to take advantage of iPort's web-based DCS technology.

Built on agile, thin client architecture, iPort deploys rapidly and is cost-effective to maintain. Companies using iPort can handle multiple airlines simultaneously, connecting airlines and ground handlers to one central system. iPort helps ground handlers reduce IT costs and increase

airport adoption and acceptance. Compatible with any passenger service system (PSS), iPort not only streamlines IT processes for airlines, but also provides passengers with a convenient self-serve check-in process through all channels, on-site and online. iPort's flexibility improves the customer experience and reduces airport congestion.

Dan Westbrook, Travelport's Vice President and General Manager for Air Commerce Technologies, said:

"Having a regional and industry leader like Talma be the first to launch and adopt iPort's DCS technology in the region is a clear endorsement of our iPort technology and the flexible solutions it provides to meet the unique needs of companies across the globe."

Rodrigo Martins, VP Ground Handling Services of Talma, said:

"iPort offers impressive features that will help Talma lower costs, improve efficiencies, and increase revenues, allowing us to continue our commercial growth in Peru and in the region."

Hans van Engelen, Res2's Chief Executive Officer, added:

"Since iPort's launch, ground handling companies around the world have quickly realized the tremendous value this powerful DCS solution offers the industry in cost savings and increased operational efficiencies."

About Travelport

Travelport is the technology company which makes the experience of buying and managing travel continually better. It operates a travel commerce platform providing distribution, technology, payment and other solutions for the global travel and tourism industry. The company facilitates travel commerce by connecting the world's leading travel providers with online and offline travel buyers in a proprietary business-to-business (B2B) travel platform.

Travelport has a leading position in airline merchandising, hotel content and distribution, car rental, mobile commerce and B2B payment solutions. The company also provides IT services to airlines, such as shopping, ticketing, departure control and other solutions. With net revenue of over \$2.5 billion in 2018, Travelport is headquartered in Langley, U.K., has over 3,700 employees and is represented in approximately 180 countries and territories.

About Talma

In 2015 Talma attended more than 100,000 flights and moved more than 190,000 metric tons of air freight, both domestic and international. Talma has more than 3,600 expert collaborators trained to the highest international standards, operating at the 19 principal airports in Peru. Talma has a presence in Mexico through of subsidiary companies providing warehousing, handling and custody services for airlines and cargo consolidators. Talma also holds concessions for 12 regional airports in Peru through our subsidiary company Aeropuertos del Peru S.A. (AdP). Talma is a company in constant evolution, always seeking to implement new technologies, processes and certifications that help to position us as one of the leading companies in its field in Latin America.
