

More accurate search and smarter clipboard powers performance and productivity for Travelport CETS reservation system

22 September 2017

Travelport (NYSE: TVPT), a leading Travel Commerce Platform, has upgraded its Travelport CETS' (Central European Touristic Solutions) reservation system with powerful new search features and additional clipboard functionality.

Today's travel agents are fulfilling an increasingly complex array of itineraries, involving multiple components. With travelers expecting instant, accurate and engaging content, more and more permutations and computations are taking place for each search to quickly deliver results relevant to their individual needs.

Designed to meet these increasing demands, this new improved version of Travelport CETS' fully integrated search engine, PowerSearch introduces new search criteria of: package tours, hotels and flights to enable agents to provide a more tailored service. By applying filters for hotels such as ratings, disabled-friendly, adults only, perfect for the honeymoon or pets allowed agents can quickly filter properties relevant to customer's individual needs. When booking flights, agents can now also suggest itineraries with a specific airline, providing greater flexibility to create customized tours from options returned in a clear, easy to read screen.

Increased relevance of the results returned is one key driver to improved conversion for the agents using the CETS reservation system, but the additional new smart clipboard provides an exclusive advantage of delivering smarter, more personalized experiences. Providing real-time synchronized pricing updates, for intermediate data stored during the booking process. CETS smart clipboard allows agents to copy and store up to 50 shopping queries that can be viewed

during the travel planning and booking process, confident that they are up to date contain the latest travel offers.

Rudolf Mertl, Managing Director at Travelport Austria commented: “We are delighted to launch such an easy to use and efficient way for agents to quickly deliver results relevant to customer individual needs. A real timesaver for agents, providing productivity and workflow benefits, the new PowerSearch and clipboard features will help agencies to drive conversion and maximize travel performance in today’s competitive marketplace.”
