Redefining travel commerce

We're
redefining
the traveler profile for corporations

Delivering shared data across your travel program

Travel today is driven by personalized preferences. Access to up-to-date traveler profiles is essential to a robust travel program. The challenge is keeping this data synchronized across multiple systems, both internally and with your travel management partners. Our solution removes challenges by doing the work for you and gives ownership of profile data to your travelers, reducing your reliance on third parties.

A comprehensive answer to managing all profile needs

Travelport Universal Profile is a traveler-centric profile management solution that uniquely matches the needs of corporations. It is platform-independent, accessed via the Internet, simple to use and loaded with features you and your travelers need for effective travel program management. A key capability is synchronization of new or updated profile data across the internal, partner and third-party systems participating in your program – all through one central source.

### Designed to provide complete control, global access and lower costs

– Consolidate traveler profiles into a single, centrally managed information source that's owned by you

– Give travelers ownership of their profiles to book trip components that best match their location and preferences – all within your policy

– Instantly synchronize new and updated profiles across your program, from your online booking tool to your HR and travel management company (TMC) systems

– Make profile management more economical by saving time and money while providing greater traveler satisfaction

– Boost precision, accuracy and more comprehensive profile reporting

A holistic approach to your every need

Travelport Universal Profile is an integral component of the Travelport Corporate Solutions. Our complete range of corporate solutions provides an end-to-end offering through a range of tools that are easy to use, totally secure and accessible 24/7 via any device. This includes:

Travelport Launchpad - A traveler gateway to manage all aspects of corporate travel, ranging from trip planning to expense reconciliation.

Travelport Business Booking Tool - An easy and cost effective way to manage your traveler booking activities and ensure policy compliance

Travelport Corporate Solutions

Managing profiles your way

Our comprehensive profile solution gives your travelers a portable, consistent and relevant experience. It also gives you control over their profiles, which can be a constantly changing area in your program.

One source can keep everyone connected and current

– Give travelers access to update profiles via Travelport Launchpad using their device of choice.

– View, customize and manage profiles on your travelers' behalf.

– Deliver personalized and highly responsive traveler services.

– Make your TMC partnerships stronger by providing current profile data.

– Ensure last-minute profile updates are reflected in every system.

– Reduce risk and errors associated with missing traveler preferences.

– Receive reporting alerts when profiles need administering or updating.

– Ensure consistent, accurate profile data is reflected through the booking process and captured in the reporting elements.
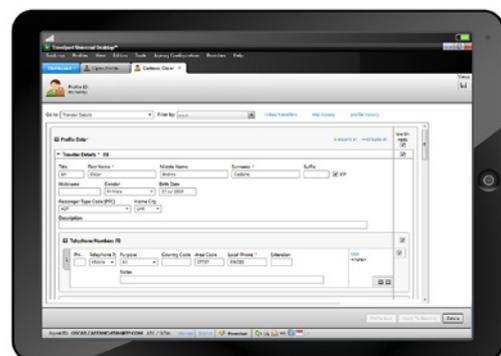

Complete synchronization

– This independent profile system can work with your booking tool, TMC partner and global distribution system (GDS) to ensure personal information and preferences are accurate and up-to-date.

– Interfaces with other providers are available for a seamless experience and expanded access to unrivaled travel content.

– Automated HR feeds support two-way synchronization with a growing number of leading online booking tools.

– Profiles can be made available through the Travelport Universal API application programming interface and our open systems platform to any third party.

A simple design for a complex process

– Three uniquely designed profile screens are presented based on the roles of your users. There are custom screens for travelers, travel arrangers and TMCs, giving you a complete view.

– Easy-to-use graphical screens lend familiar, everyday Web functionality to travelers and travel arrangers, so no formal training is required.

– Unique views can show a traveler's past, present and future travel landscape across any channel in which a traveler interacts. This provides a rich data source to personalize travel experiences.

An all-inclusive profile system for your corporation
